# Akash Patel

Portfolio | GitHub | Linkdin | Leetcode          Email: akashpatel20606@gmail.com | Mobile: 9369201975

## Education

Kamla Nehru Institute of technology                                                     Sultanpur, India
Batchelor of Technology in Information technology | CGPA: 8.5                            2020-2024

## Technical Skills

| | | |
|---|---|---|
| **Languages** | : | C, C++, JavaScript, Java, HTML, CSS , SCSS |
| **Frameworks** | : | Reactjs, Expressjs, Nodejs, Bootstrap |
| **Libraries** | : | Chakra-ui/react , Redux, Axios, Spring |
| **Database** | : | Mongo dB |
| **Dev Tools** | : | Visual Studio Code, Git, GitHub, Postman, Firebase |

## Experiences

**Backend Developer Intern**                                                            Onthemove

- Leveraged JavaScript, Node.js, MongoDB and Express.js to develop and maintain backend functionalities for Onthemove website.
- Implemented new modules into the website, ensuring seamless integration and optimal performance.
- Collaborated with cross-functional teams, including frontend developers and designers, to ensure cohesive and user-friendly features.
- Proactively identified and resolved bugs and technical issues, ensuring a smooth user experience.
- Actively contributed to enhancing the functionality and stability of the platform, through continuous improvements and optimizations.

## Projects

**PaperSelf**                                    GitHub | Live Link

- Developed a student-focused React-based project facilitating access to previous year exams and course-related books, enabling seamless login, material upload, and download functionalities.
- Employed responsive design techniques to ensure optimal compatibility and user experience across various devices, enhancing accessibility and usability of the platform.
- **Tech Used**: ReactJS, CSS, SCSS, Nodejs, ExpressJS, Authprovider0, Cloudnary, MongoDB

**TalkTime**                                    GitHub | Live Link

- TalkTime is a real-time chat application that connect instantly, chat effortlessly, and stay connected with friends, family, and colleagues anytime, anywhere.
- **Tech Used**: ReactJS, Firebase, Chatengine

**Weather App**                                    GitHub | Live Link

- The React.js-based Weather App is a user-friendly and visually appealing application that leverages an API to provide real-time weather information. With its intuitive interface, users can effortlessly search for locations and access accurate weather data, including temperature, humidity, and current conditions.
- **Tech Used**: ReactJS, CSS, JavaScript.

**LinkUp**                                    GitHub | Live Link

- A social media app that where a user can upload, delete a post.
- Users Can also able to login, register and logout.
- **Tech Used**: ReactJS, CSS, SCSS, Nodejs, ExpressJS, MongoDB

## Achievements

- Solved more then 1000+ problems on various coding platforms as Leetcode, Codeforces.
